

# Rejuvenate your Face and Body with Non-Invasive Cosmetic Procedures

Dr. Martin Alpert has specialized in non-invasive cosmetic procedures for over 12 years. He is a dedicated, caring physician who provides patients with quality care. His goal is to help them achieve a natural, youthful appearance while enhancing their beauty. Dr. Alpert offers a variety of procedures including Facial and Hand rejuvenation, Botox, Fillers, Zerona Body Slimming, Laser treatments, Custom Facials and Microdermabrasion.

## FACIAL & HAND REJUVINATION

**BOTOX® Cosmetic** is used to reduce or eliminate the appearance of facial lines and wrinkles. It helps to smooth crow's feet, forehead and frown lines.

**JUVÉDERM®** is a smooth gel made of hyaluronic acid that helps add volume. JUVÉDERM® is used under the skin to instantly smooth away facial wrinkles and folds.

**RADIESSE®** dermal filler, a water based gel, is injected into the skin. It stimulates the growth of new collagen. RADIESSE® is the ideal choice for total facial contouring.

**RESTYLANE®**, an injectable, diminishes fine lines and wrinkles, while adding volume to help tighten loose skin.

**HAND REJUVINATION** improves the look of hands by adding volume and diminishing age spots and fine lines. Options Include:

- \*Fillers which add volume and remove fine lines
- \*Laser Treatments, Nitrous Oxide, and Bleaching help remove and diminish brown/aging spots

## LASER TREATMENTS

**ZERONA®** is a non-invasive body slimming procedure that removes fat and reduces inches. There is no pain, downtime or surgery. It consists of six treatments over a two-week period. You will lose several inches over a two to four weeks.

**THE TRINITY™ SKIN SERIES** consists of three non-surgical, non-invasive procedures, completed during one visit. The series includes color correction, skin tightening and wrinkle treatment for the face and hands. In just three monthly treatment sessions we can help you achieve skin rejuvenation, skin tightening and a healthier, youthful appearance. Results are visible after one treatment; however a series of three treatments is suggested for optimal results. The procedures include:

**FOTOFACIAL** is a non-abrasive, rejuvenation of your skin using Intense Pulsed Light (IPL). IPL improves the signs of sun damage (such as brown spots), rosacea, and vascular lesions on the face, hands and body. It is also used to reduce the appearance of mild acne scars and fine lines around the eyes and mouth.

**MATRIX LASER** uses radio frequency to heat the deeper layers of the skin while protecting the surface. This heating activates the formation of new collagen cells, resulting in a reduction of the nasolabial folds, marionette lines, perioral wrinkles, crow's feet, forehead lines, and scars.

**REFIRME™** is a non-invasive procedure that tightens the skin and helps diminish the appearance of fine lines and wrinkles. This procedure features the revolutionary **elos™** technology that enables you to comfortably achieve a more youthful, toned and lifted appearance without enduring downtime.

## LASER REMOVAL

**LASER VEIN REMOVAL** by **elos™** uses combined energies to effectively and gently reduce problem veins on the legs and face. The procedure is painless and does not require anesthesia. Normal activities can be resumed immediately. More than one treatment may be necessary.

**LASER HAIR REMOVAL** by **elos™** produces highly focused, intense beams of bi-polar radio frequency and light energies to precisely target and destroy the hair follicles. This prevents hair growth in both men and women. Multiple treatments may be necessary.

**ACNE SCARING REMOVAL** is now easier with Fotofacial laser treatments. Using Intense Pulsed Light (IPL), this treatment lessens acne scarring as well as helping with tone, texture and the appearance of your skin. To achieve a successful result more than one treatment may be necessary.

## SKIN CARE

**MICRODERMABRASION** removes the dead, skin cells on the surface of the skin by light abrasion. This helps to eliminate sun- damage and lessen scars and dark spots on the skin.

**GLYCOLIC PEELS** also known as lunchtime peels, remove dead skin cells, reduce sun damage and the appearance of acne scars.

**CUSTOM FACIALS** cleanse, exfoliate, treat and moisturize your skin. The results allow your skin to absorb skincare products, while stimulating the growth of new, healthy skin cells.

**LATISSE®** solution is a prescription treatment used to grow eyelashes, making them longer, thicker and darker. It also helps to grow hair on eyebrows.
